Accommodations

For a student who is hard of hearing, I will add subtitles to the videos provided. I will also make sure that the slideshow is presented and that if necessary, I will give further information to the student.

For a visual individual, I will use descriptive language so that my student stays engaged in the material. If a student needs less screen time, I will decrease the amount of lecture time for the students.

For exceptional students, I could have the student(s) work with individualized studying or to also help their peers if their peers need assistance.
